Mobile App A mobile app is a program which can be run on mobile devices, such as phones and tablets. Mobile apps are typically light-weight programs, for example, games. Web App Web app refers to web pages that look and behave like desktop applications but instead run in a web browser. Web apps are usually made up of server-side code that is interpreted and displayed in a browser, rather than through the browser's own interpretive engine. Web apps can use a local server, a web server, a CDN, or a combination. Map An interactive, two- or three-dimensional map that shows geographical features, including coastlines, rivers, lakes, and mountains. The most common use of a map is to show where various places, routes, and transportation hubs are located, but it can also be used to show relationships between places in an organization, such as offices, departments, or geographical locations. Map Editor A map editor is a software application designed to create, edit, manage, and display maps. Users may add or modify map features such as roads, buildings, and points of interest using the map editor. Search Index An index of all features that are displayed on a map, such as street names or points of interest. Indexes can be hierarchical or non-hierarchical, allowing users to search by name or by location. For example, an index of every city in the United States would be a non-hierarchical index. A hierarchical index would allow the user to search by location of a city. For example, a user could look up cities with zip codes from the northeast. State Department Store A state department store (or retail department store) is a type of department store, a type of retail store which focuses on high-volume sales, typically of books, clothing, food, toys, and seasonal items. The term is also applied to specific stores in specific countries, such as a California state department store. Topological map A topological map is a representation of a map in which the map has a flat grid-like structure in which each area of the map is assigned a unique number. For example, the city of New York can be represented as a grid, with each numbered square representing a specific area. Topological maps can be used to display land-use data on a map. Web store

External resources AutoCAD is a member of the Open Design Alliance. Its functionality is similar to other products and companies such as SolidWorks, Autodesk Revit and Archicad. BIM in AutoCAD As of 2014, AutoCAD included BIM functionality as a BIM modeling solution with a 3D Warehouse. File formats AutoCAD uses many different file formats to create and work with a model. DWG The DWG (AutoCAD Drawing) file format is a proprietary, scalable vector graphics format used by AutoCAD, AutoCAD LT, AutoCAD Architecture, AutoCAD Electrical, AutoCAD LT Architecture, AutoCAD Mechanical, AutoCAD Electrical, AutoCAD MEP, AutoCAD Civil 3D and AutoCAD Map 3D. DWG is one of the most common CAD file formats used in a wide range of disciplines. DXF The DXF (AutoCAD Drawing Exchange Format) file format is a vector-based, compressed and structured CAD format, which is used for storing and exchanging drawings and data. The format supports both 2D and 3D models and also has extensive editing and plotting support. It is intended as a "standard" for 3D CAD and is widely supported on hardware and software platforms. It is the file format used by AutoCAD. DWF The DWF (AutoCAD Drawing) file format is a proprietary, scalable vector graphics format used by AutoCAD, AutoCAD LT, AutoCAD Architecture, AutoCAD Electrical, AutoCAD LT Architecture, AutoCAD Mechanical, AutoCAD Electrical, AutoCAD MEP, AutoCAD Civil 3D, AutoCAD Map 3D, and AutoCAD MEP. MDS The MDS (Model Data Store) file format is an ASCII text file format used to store the.DWG and.DGN (AutoCAD's native file format) files, along with some other non-model data. An MDS file is the default file format for all files that are not compatible with the DWG and DGN formats. An MDS file stores basic metadata for each model: the model's title, name, description, owner and user-defined tags. It is used to store parameters, properties and attribute settings for the models. When a model is opened from an MDS file, it 5b5f913d15

1. Select "New" in the new project window, then "Drafting". 2. Change the "User Interface Settings" from 32-bit to 64-bit by selecting the "General" tab, and make sure "32-bit applications" is selected, then click the right arrow and select "64-bit". 3. In the "New drawing" window, set the "Dimensions" value from "Auto" to "4 x 4 x 12". 4. Set the "Grid" value from "New Grid" to "None". 5. Set the "Slope" value from "Auto" to "0", and choose "Grid Line Numbering". 6. Select the bottom edge of the rectangle and click "Update". 7. Click "OK". 8. Click the "Grid" button and choose "4mm". 9. Click the "Draw" button and draw a square. 10. Right-click the square and choose "Snap". 11. Right-click the square and choose "Align Center". 12. Move the square until it snaps to the square at (1,0). 13. Right-click the square and choose "Align With". 14. Move the square until it snaps to the grid at (2,3). 15. Right-click the square and choose "Align With". 16. Click the "Edit" button and change the "Dimensions" value from "4" to "16". 17. Change the "Slope" value from "0" to "15". 18. Click "OK". 19. Right-click the square and choose "Snap". 20. Right-click the square and choose "Align Center". 21. Move the square until it snaps to the grid at (4,3). 22. Right-click the square and choose "Align With". 23. Move the square until it snaps to the grid at (3,4). 24. Right-click the square and choose "Align With". 25. Move the square until it snaps to the grid at (0,5). 26. Right-click the square and choose "Align With". 27. Move the square until it snaps to the grid at (4,5). 28. Right-click the square and choose "Align With". 29. Click "Add". 30. Press "Edit" and change

Markup import Markup Assist automatically places revised drawings on a clean sheet of paper when using the Markup command. It automatically updates the current drawing with the new placement when the command is executed again. Markup Assist automatically updates the drawing sheet when importing feedback. AutoCAD Architecture 2020 adds a new architecture style that you can use to rapidly design buildings that are inspired by your favorite public structures. (video: 1:40 min.) Add robust, intuitive functionality to your commercial design drawings with the 2020 release of AutoCAD Architecture. Architecture Design allows you to design new commercial buildings, demolish existing ones, and even produce photo-realistic renderings. Add powerful visualization and editing tools to your architectural design work. The 2020 release of AutoCAD Architecture brings out the best features of existing AutoCAD Architecture 2020 products, such as the Variance, Floors, and Facade objects, and they have been enhanced with new capabilities. AutoCAD Architecture adds a new workflow for creating architectural drawings with this release. For example, the Go To command adds a new command to the ribbon for designing and manipulating buildings. Autodesk has developed a toolkit to support the workflow of designing, drafting, and presenting architectural drawings. The Architecture Tools feature provides a range of useful tools to enable you to design, draw, and present architectural drawings more efficiently. These tools include the Autodesk Architecture Design 3D Builder. More Features 1:15 AutoCAD Architecture 2 Autodesk Architecture Design 3D Builder Architecture Design allows you to design new buildings, demolish existing ones, and even produce photo-realistic renderings. The program has been enhanced with new features and functionality, such as the following: * Establish communication with the Autodesk Construction community to collaborate on architecture projects. * Establish communication with Autodesk Building Design for constructing your designs, including building envelopes, roof models, and façade modeling. * Create on-the-fly surfaces that include models, textures, and rendering techniques. * Provide professional visual effects that help you to communicate your designs to stakeholders. * Use AutoCAD Architecture to convert models into 3D geometry for print and render. You can download a free trial version of Architecture Design 2020 from the Autodesk website. 1:40 AutoCAD Architecture 2019 AutoCAD
