Help to recover deleted files from Mac. How to Repair Corrupt, Deleted, or Lost Files Restoring files and folders that have been accidentally deleted is a common problem on Mac computers. But, where do you start when you have lost your files or folders? What if you do not have a Mac with the software to recover data? What if the software you have is outdated, not working, or simply too costly? And, what if the files or folders were on an external hard drive, external backup drive, or an online backup service? With this software, you can easily restore a damaged or deleted file, quickly repair damaged files, and easily recover lost or deleted files. We designed this software to support all Mac file systems. All you have to do is choose the folder that contains the files, then choose the output format. Once you are done, you can choose the output format to save the recovered files to. Choose the output location, then press the 'Recover' button. The recovered files will be saved to the selected location. From the very beginning of our company, we have been working hard to provide high quality products at a very affordable price. We provide a wide variety of applications for consumers and businesses that are easy to use, but many of them come with a price tag attached. The majority of software products that have sold well, is due to its high quality and features at a low price. We took advantage of this business strategy, and now we are proud to provide our customers the chance to buy a wide range of products at a very low price. Windows includes numerous software programs such as MS Office, Internet Explorer, Paint, and Access that make it easy for users to perform daily tasks. The collection of MS Office programs such as MS Word, Excel, Access, PowerPoint and others are used by a majority of people. MS Office is an essential software program and is used as a standard in business and home. Features of Reimage Plus: An all-in-one recovery tool for your PC. RESTORE DELETED FILES,FOLDERS AND EMAIL Recovers files/folders from local, external and network storage, including USB, FireWire and eSATA.
